

MAKE GAINS IN JUST 8 WEEKS

DreamBox Math for Summer Programs

FIND OUT WHAT A DIFFERENCE 5+ DREAMBOX LESSONS PER WEEK CAN MAKE IN STUDENT LEARNING PROGRESS

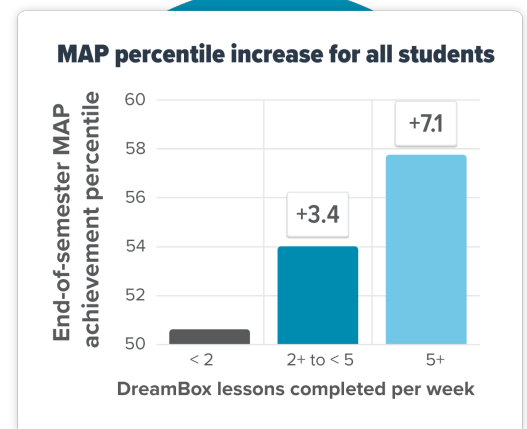

Summer school programs provide students with learning recovery and offer important opportunities to reinforce math and reading skills. DreamBox Math supports educators as they accelerate learning during these crucial instruction periods. The DreamBox programs encourage independent learning that's easy to implement, engages students and supports learning recovery:

Personalized: DreamBox Math adapts and differentiates in real time based on student behaviors within the program. By automatically and continually supporting students at their right levels, the program engages students and motivates them to take agency in their learning.

Flexible: DreamBox Math can easily fit within in-school programs, hybrid learning opportunities or at-home practice. The program provides high-quality, research-based content that enables students to work independently during summer school programs to accommodate instructional limitations.

Data-driven: DreamBox Math captures student data in real time to help educators measure progress, identify learning gains and areas for growth and create differentiated assignments.

Effective: Research and data indicate that when implemented with frequency and fidelity, DreamBox Math has positive impacts on student learning. In just 8 weeks, students demonstrated over 5 points of growth on NWEA MAP assessments.

DreamBox Math sample summer implementation

Program usage	Four-week program	Six-week program	Eight-week program	Predicted outcomes
10-15 lessons per week 30 minutes per day Five days each week	24-45 total lessons	60-90 total lessons	80-120 total lessons	In eight weeks of instruction, students who completed an average of five or more DreamBox Math lessons per week grew more than 5 national percentile points.
