- ✓ Title III, Part A
- ✓ Title IV, Parts A and B
- ✓ Title V
- ✓ Title VI
- ✓ Striving readers/CLSD
- ✓ GEAR UP
- ✓ Innovative Approaches to Literacy
- ✓ ESSER Funds

Research-proven results

Reading Plus is an evidence-based program with an extensive research portfolio that significantly improves student outcomes.

Reading Plus is designed to accelerate reading proficiency growth in struggling readers. In just 40 to 60 hours using Reading Plus, striving students make significant gains toward grade-level reading proficiency.

Reading Plus was found to have STRONG evidence to support ESSA by the Center for Research and Reform in Education at Johns Hopkins University.

Personalized learning, teacher-led instruction

Reading Plus provides Intelligent Adaptive Learning™ technology for all learners. The adaptive assessment, InSight, provides a fast, effective way to determine students' academic standing and ensure they are on a personalized learning path to success. Printable resources, supplemental materials and integrated teaching tools – video tutorials, printable worksheets, graphic organizers and lesson plans – support instruction and differentiation.

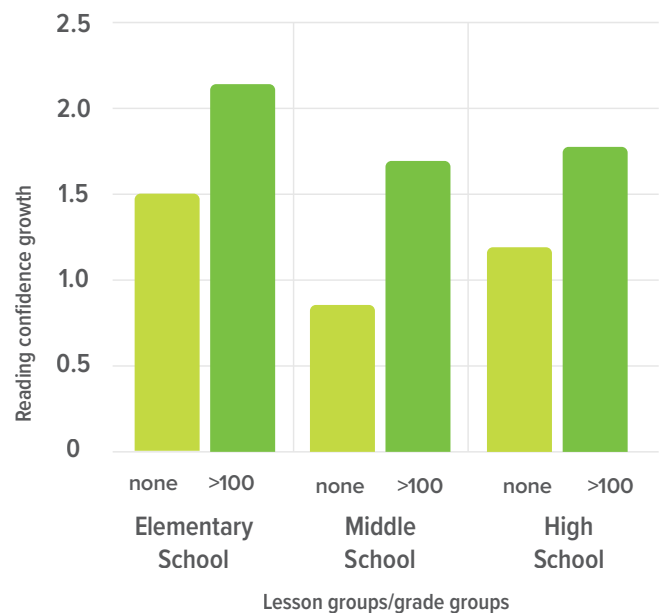

The only reading program that measures motivation

Motivation is critical for student learning. Reading Plus is the only reading program that measures and monitors each student's motivation and confidence as a reader. Documented research shows that students make statistically significant gains in confidence and interest as they complete a year of reading instruction and practice with Reading Plus.

Reading Plus provides an extensive library of engaging informational and literary selections that support student-centric learning. Students select texts from eight interest filters that provide agency over reading material. Within each category, students will find texts from global sources that support building knowledge across curriculum. Engaging student-suggested topics not only reinforce classroom learning objectives, but also allow students to relate to shared experiences and discover the world around them.
