

# Mathematizing **Your** World

Grade Levels: K-12

## 1 Display an image to students.

*The same image can be used for all students in a school/district on the same day. See below for examples.*

## 2 Have students answer the following questions in their math journal.

👁️ **What do you see?**

💡 **What do you think?**

💭 **What do you wonder?**

## 3 Students discuss their answers.

### Extension

- ✓ Start your math block each day with a new image.
- ✓ Share student responses with colleagues.
- ✓ Have every student bring in an object or image. Then, students complete a gallery walk answering these questions for 3-5 images of their choice.
